## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 6-10 and 12-26 allowed.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 rejected under 35 U.S.C. 103(a) as being unpatentable over Sunohara et al. (5,587,819) in view of Kamiya (JP 11-344703) in further view of Kaplan (3,812,394)

Regarding Claims 1-5, Sunohara et al. disclose a display device where a reflective direct-view type display device including a first substrate having two major surfaces and electrode provided on a first major surface, a second substrate having a two major surfaces and color filter layers and pixel electrodes provided on a first major surface, a light-scattering medium interposed between the first and second substrates, positioned with the electrode opposes pixel electrode, and at least one color filter layer provided on the first major surface of the first substrate and opposing at least one of the color filter layers provided on the first major surface of the second substrate. Sunohara et al. fail to disclose the blue color filter configuration and the required blue color filter with respect to red and green color filters. However, Kamiya discloses a reflection type color liquid crystal display device where the required blue color filter configuration is disclosed. Furthermore, Kaplan discloses an image screen with single, optically

continuous filter where the required blue color filter with respect to red and green filters is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required blue color filter and the required blue color filter with respect to red and green color filters in Sunohara et al. as taught by Kamiya and Kaplan respectively in order to have a liquid crystal display device with higher performance.

### *Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (703) 305-3868. The examiner can normally be reached on M - F 8:00 - 5:00.
